Subject: petition concerning lack of unity in 09/622,419

Before I can decide this petition, please review file and complete search, if needed, to determine whether the product of claim 7, for example, gene construct comprising SEQ ID No 1 and 3, is free of the prior art. If it is, then we need to rejoin method and product claims. If it is not, then that info would have been necessary to make lack of unity in first place.

Also since petition has been entered in PALM, we won't be able to mail out that advisory action until petition is decided.

Thanks for info-
Julie
